

A LONGER LIFE. AT NO EXTRA COST. WHAT'S NOT TO LIKE?

The new Fort Vale **Superseat Footvalve** is a radical alternative to an age-old problem.

Crevice corrosion is a common issue within the chemical and food-duty markets, particularly at the union of the sealing face and the main footvalve seal. Previously, the best solution was to use high nickel steels such as Hastelloy® in an effort to solve the issue - but this could be prohibitively expensive.

That's why Fort Vale is now using Inconel® as part of their manufacturing process. With a much higher pitting index than 316 stainless steel, greater resistance is available to a wider range of chemical applications - ensuring long-life and trouble free use.

Not every company can do this. **Not every company is Fort Vale.**

FORT VALE.
MADE TO LAST.
